SHARESAVE

Real-time, risk-free, hands-free automatic life-cycle management of Amazon EC2 commitments

- **Pay only for what you use.**
- **Achieve up to 40% savings, risk-free.***
- **Free up your engineers to focus on innovation.**

* On average, nOps achieves a 40% discount off the AWS On-Demand price. The discount depends on the customer's Regions, instance types, and volume of savings.

Risk-free, buy-back guarantee.	Zero engineering effort.	Immediate cost savings.	24/7 continuous cost optimization.	Shared-savings pricing model.	5-minute onboarding process.

Have you made a 1-year or 3-year commitment to AWS Reserved Instances (RIs) or Savings Plans (SPs) to optimize cloud compute costs? If so:

- Are you concerned about risking over-provisioning or under-provisioning because you can't predict your Amazon Elastic Compute Cloud (Amazon EC2) usage that far in advance?
- Is your engineering team devoting their time to continuously monitoring and optimizing Amazon EC2 environments to maximize cloud savings — time that could be better spent on innovation?

## ShareSave by nOps ensures maximum savings and eliminates waste — automatically.

- Adjusts Amazon EC2 commitments in real time based on the environment's capacity requirements.
- Achieves optimal commitment utilization and a dramatic reduction in Amazon EC2 spend.
- Eliminates the need for constant supervision of unused RI commitments.

Marketplace Seller

**powered by** aws

aws marketplace

Here's how it works:

- The ShareSave AI engine collects Amazon CloudWatch and AWS CloudTrail logs and continuously monitors and analyzes infrastructure usage data points.
- ShareSave automatically reacts in real time by purchasing RIs and/or SPs upon an increase in compute usage, and selling RIs and/or SPs upon a decrease in compute usage. nOps continuously purchases and sells commitments on an hourly basis, depending on your infrastructure's capacity changes.
- ShareSave grabs the most lucrative discounts in the Amazon EC2 Reserved Instance Marketplace and utilizes 3-year no-upfront commitments when purchasing SPs.

With ShareSave automation, you'll save more and avoid the financial risk of self-managed RI and SP commitments.

We share a percentage of our savings with you, which increases if your volume expands or you purchase additional nOps services.

ShareSave Package	Your Savings	Benefits
nOps Essential	92% of the annualized Total Savings	Targeted recommendations for unused EBS, EIPs, NAT Gateways, Load balancers, EC2 resource rightsizing every week prioritized by effort to reduce costs.
Containers	92% of the annualized Total Savings	Targeted recommendations every week prioritized by effort to reduce costs. Tune your pod configurations, optimize your service scheduling, recommend precise cluster node size and node group policies, rightsize cluster nodes, recommend RI and Spot optimizations.
Spot	60% of the realized Total Savings	Automatically manage Auto Scaling Groups with on-demand and spot instances to maximize cost savings.
Risk-Free Commitment Management	60% of the realized Total Savings	Risk-free auto-pilot EC2, RDS, ElastiCache, OpenSearch, RedShift Reserved Instances Management.
Resource Scheduler	60% of the realized Total Savings	Automatically stop, start, or optimize resources based on the usage pattern.

It's easy to get started with ShareSave. Onboarding takes 5 minutes.

- Provide nOps with read-only access to your Amazon EC2 usage patterns.
- Based on your Amazon EC2 usage patterns, nOps begins to buy RI and/or SP commitments.
- Whether your usage increases or decreases, you only pay for what you use.
